Environmental management System (EMS)

ENVIRONMENTAL MANAGEMENT SYSTEM

Embracing the Environment

Why does an organization need EMS ?

ISO 14001 : 2015 - environmental Management System

In a view of global sensitization towards environmental protection and sustainable development, there has been growing interest and commitment to improve environment management practices in different spheres of life.

Industrial growth is required for prosperity of the nation, but at the same time impact on the environment by creation of pollution in air, water and land can be considered, on top priority, especially by the industries and trade / business organizations, particularly those responsible for causing or generating pollution.

The regulatory bodies or agencies including industries and other trade organizations strive to minimize environment by creation of pollution in air, water and land can be considered, on top priority, especially by the industries and trade / business organization, particularly those responsible for causing or generating pollution.

The regulatory bodies or agencies including industries and other trade organization strive to minimize environmental degradation.

To protect the environment from adverse significant impact of pollution and also to conserve the natural resources, there exists a need to create awareness on ISO 14001 - EMS requirements, for its effective implementation in any organization, which has no become a necessity for protection of environment and thereby human lives.

Benefit of implementation of EMS in the Organization:

- It gives any assurance that the organization meets and would continue to meet legal (environmental laws & regulation) and corporate policy requirements, today, tomorrow and the day after.
- Shows to business partners, regulatory agencies and community that the organization is environmentally responsible.
- Increase competitiveness of the organization.
- Reduces costs as a result of potentially lower insurance premiums.
- Increases profits, through potential process improvement.
- Reduces environment liabilities and improve communication about environmental issues inside and outside of participating organizations.
- SAFETY BENEFITS : through review of emergency preparedness and response procedures as the organizations identify and implement significant safety improvements.
- Meet demand and recognition of international trade and market.

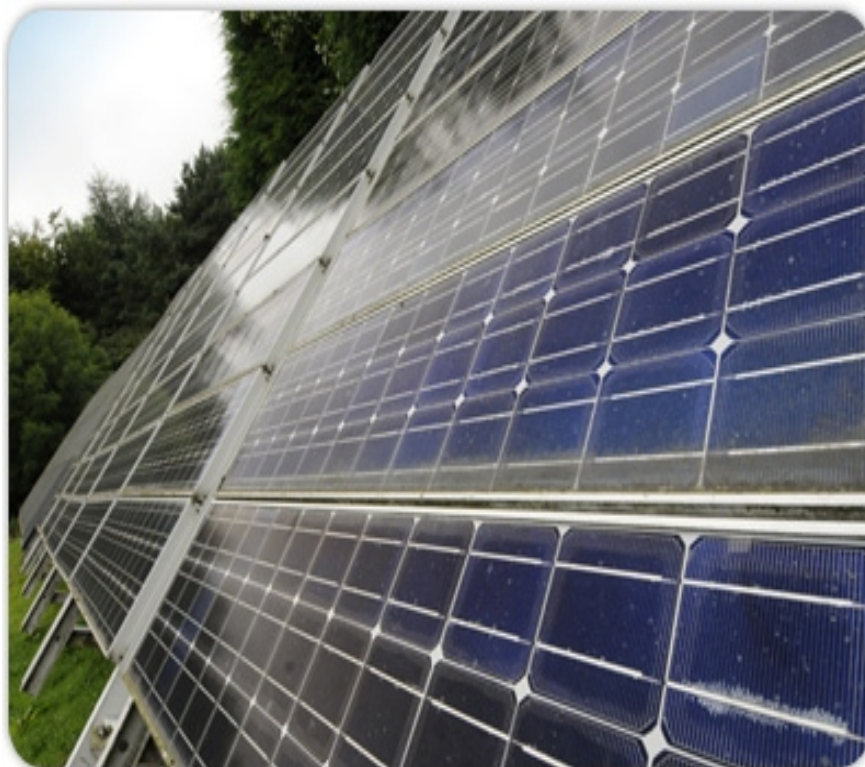

How to go about ISO 14001 : 2015 - Certification for ENVIRONMENTAL MANAGEMENT SYSTEM ?

- Making and environmental policy available to the public to carry out continuous review of the environmental aspects & significant impacts of products, activities and services.
- Identification and documentation of all aspects and their activities product and services on the environmental for achieving, demonstrating sound environment performance.
- Base on this environmental aspects and impacts, goals and objectives are establish along with the environmental policy.
- Implement the processes against environmental policy, objective, targets, legal and other requirements, reporting of the results and taking action to continually improve performance of EMS.
